Chief concern (in your words)

Fever, chills, and confusion for the past 2 days, with less urine than usual. Family brought me in because I seemed "not myself."

Current medications

- Metformin 1000 mg — twice daily (diabetes)
- Lisinopril 20 mg — once daily (blood pressure)
- Warfarin 5 mg — once daily (atrial fibrillation)
- Atorvastatin 40 mg — once daily at night

Allergies

- Penicillin — rash and hives
- Sulfa drugs — swelling

Family history

- Father — Type 2 diabetes; deceased, heart attack at 71
- Mother — High blood pressure and chronic kidney disease
- Brother — Type 2 diabetes
